LEIPAform ECO MAP

Designed
for recycling*

**INNOVATIVE, SUSTAINABLE PACKAGING SOLUTION
FOR COLD CUTS SUCH AS HAM, CHEESE ETC.**

YOUR BENEFITS AT A GLANCE:

- packaging increases your product's visibility at the point of sale with a sustainable appearance
- this concept usually does not require any new investments in your existing packing lines
- approach sustainability with a patented solution that perfectly fits to the circular economy and complies with European and British standards
- reduced plastic utilization in comparison with common thermoformable solutions
- excellent barrier properties that extend your product's shelf life without any compromise
- lower eco-contributions in the regions where the EPR (Extended Producer Responsibility) regulations apply

LEIPAform ECO

MAP

Designed for recycling paper based packaging solution for cold cuts

LEIPAform ECO DUALpeel is a patented, paper-based composite solution for different types of fresh and processed food applications packed in a modified atmosphere. This innovative thermoformable paper tray does not comprise barrier, sealability but also sustainability. Its special construction enables a complete and easy manual separation of paper from the plastic layer. LEIPAform's outstanding recyclability level has been confirmed by an external German independent institute.

PROPERTIES:

- is a recyclable solution containing minimum 80% of paper content from virgin paper; ideal for replacement of fully plastic or non-recyclable structures
- *recyclability confirmed by the PTS Institute (Papiertechnische Stiftung)
- solution has excellent barrier properties against oxygen, moisture, fat and aroma
- guarantees excellent processing capabilities
- is sealable with conventional top webs
- drawdown depth of the tray even up to 25 mm
- available in peelable and non-peelable version

APPLICATIONS:

- appropriate for cold cuts, cheese, meat, fish, poultry, pasta, pizza and others

It is important to use recyclable packaging, as it helps to reduce waste and conserve resources. It helps to keep materials out of landfills and promote a more sustainable approach, supporting the circular economy, where materials can be reused and repurposed, reducing the need for virgin materials and energy-intensive production processes.

RELIABLE PRODUCT PROTECTION

MVTR - very high
OTR - high
MOAH - excellent
AROMA - excellent
FAT - very good
