LEIPA packaging

Every new packaging solution starts with an idea

Application

Corrugated board is becoming increasingly important – and so is choosing the right testliner. Made from recycled fibres it is lightweight, robust and printable in runs ranging from mass production to very small batches. Impressive: Both of this is valid for the testliner and also the corrugated cardboard. No wonder that corrugated cardboard is such an important factor of the growing packaging sector.

LEIPA has been producing high-quality white testliner since 2001 – and has done real pioneering work with the PM 3 and the coated testliner in cooperation with customers and long-standing partners. With the start-up of PM 5 and a total capacity of over 700,000 tonnes per year on two paper machines, LEIPA is one of the largest producers in Europe and an expert for coated and uncoated white top testliners.

LEIPA Classic white

Grammage 100 – 150 g/m²

Description

As an uncoated white top testliner, LEIPA Classic white is our recommendation for all applications in the corrugated board segment: consistent runnability offers ideal processing results. Optimum printing results and high color brilliance experiences are achieved in flexoprint. In both preprint and post print.

Characteristics

- Uncoated White Top Testliner
- Recommended for all WTTL applications from classic to high-end corrugated board segment
- Ready-for-use thanks to maximum runnability, printability & sprintability
- Ideal converting results
- Economical solution in the bulk segment
- FSC® and PEFC certified
- Already available from 100 g/m²

LEIPA packaging

LEIPA Lux

Grammage 130 – 200 g/m²

Description

Our white coated liner LEIPA Lux sets a standard in the field of double-coated corrugated base papers: Optimised for flexo printing, it offers a ideal surface to show off not only information, but above all colors, images and details to their best advantage.

Characteristics

- Coated White Top Testliner
- Recommended for premium printing in High Quality Postprint and Preprint
- Optimised for the shelf-ready and retail-ready packaging and e-commerce segments
- Ready-for-use thanks to maximum runnability, printability
- Ideal processing results
- FSC® and PEFC certified

LEIPA Shine

Grammage 160 – 210 g/m²

Description

LEIPA Shine, setting a high standard in high-quality recycled white coated liners for corrugated base papers. This liner has been developed with precision and impresses with features such as high brightness and an exceptionally smooth surface. This makes it ideal for your printing needs. Developed specifically for offset printing, LEIPA Shine ensures outstanding print results. Its uniform surface offers high contrast allowing colours to shine and details to stand out clearly and distinctly. What really sets LEIPA Shine apart, however, is its ability to unlock a whole spectrum of colours that brings your designs to life with remarkable richness and depth. From subtle nuances to bold statements – this paper is your canvas for creativity.

Characteristics

- Coated GD Liner
- Recommended for premium printing in high quality offset print
- Optimised for the growing quality requirements for offset corrugation
- Ready-for-use thanks to high runnability, printability
- Packaging for Food and Non-Food
- FSC® and PEFC certified
